

S.V.S.S Vinod Kumar

"AI-focused Computer Science student building intelligent software, computer vision systems, and embedded solutions that solve real-world problems."

S/O: Sammidi Govinda Rao, 50-90-23/4, Santhipuram, Near municipal School, Seethamma peta,
Visakhapatnam(Urban), Andhra Pradesh - 530016
Mobile: +91-6302112377
Email: sammidivinod@gmail.com
Language: English, Telugu ,Hindi

LinkedIn: www.linkedin.com/in/sammidi-venkata-satya-surya-vinod-kumar-a5934a315
Portfolio: https://vinod63021.github.io/My_Portfolio/

Skills

Programming: C, Java, Python, JavaScript, SQL
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
AI & Computer Vision: OpenCV, YOLOv8, OCR, Retrieval-Augmented Generation (RAG), Ollama, AI & Computer Vision
Embedded Systems: Arduino UNO, ESP32, ESP8266, IoT
Tools: Git, GitHub, Linux, Windows, VS Code, Eclipse, Android Studio, Arduino IDE

Education

2023 – 2027 B.Tech in CSE , Andhra University college of Engineering
CGPA: 8.29 till 6th semester
2021 – 2023 Intermediate, Sri Chaitanya College, Visakhapatnam
Percentage: 78.4 %
2011 – 2021 High School, V.T High School, Visakhapatnam
Percentage: 97.3 %

Experience

Oct 2025 – Present | GDGoC AUCE - Firebase Lead

- Leading the development and implementation of Firebase solutions for club projects.
- Mentoring members on Firebase technologies, including Fire Studio , Authentication, and Cloud Functions.
- (Firebase Studio, Authentication, Cloud Functions)

Jul 2025–Present | IDP Education Ltd Student Ambassador

- Representing IDP Education to promote global education opportunities.
- Engaging with students to provide guidance on study abroad pathways and events.
- (Public Speaking, Student Engagement, Guidance)

May 2025 – Jul 2025 | Steel Plant Rashtriya Ispat Nigam Limited (RINL) (On-site) – J2EE Technologies

- Developed an ETL Management System.
- Created data-driven solutions to optimize processes and improve system efficiency.
- (J2EE Technologies(Servlets, Jsp, tomcat, MySql)

Dec 2025 – March 2026 | Edge2Systems (Research Intern) – AI & Full Stack Development

- Developing AI-powered applications, intelligent automation systems, and full-stack software solutions.
- Developed Offline RAG systems, computer vision applications, and AI assistants using local LLMs.
- *(Python, Flask, JavaScript, AI, Computer Vision, RAG, Ollama, OpenCV, Git)*

Achievements/Awards

Build Bharat Through AI - Consolation:
Developed a Bluetooth-controlled bot for industrial logistics.
Green Spark Ideathon 1.0 - First Prize:
Developed an AI-powered waste management platform.
Smart India Hackathon - Consolation:
Developed an AI-powered waste management system.
Spark Nation Hackathon - Third Prize:
Developed an AI-powered child safety system for children.
NSRIT Tri-Mobility challenge - First Prize:
Developed an autonomous AI safety bot that detects falls and sends emergency SMS notifications to family members.
AURAX 2K26 - Third Prize:
Developed an autonomous AI safety bot for fall detection and emergency SMS alerts.

Activities in Sports

Competitive Roller Skating (2019 – 2022)

- **National Level:** Represented Andhra Pradesh as a participant in the 65th National School Skating Championship (SGFI) in Belgaum, Karnataka.

State Level: Secured multiple podium finishes in state-level championships, including:

- **1st Place**, 65th Y.S.R. School Games (Roller Skating).
- **1st Place** (Relay) & **3rd Place** (Elimination), 33rd AP Inter-District Championship.
- **2nd Place** (Road-I) & **3rd Place** (Rink-II), 31st AP Inter-District Championship.

District Level: Achieved 15+ medals in Visakhapatnam District Championships (2019~2024), including **5 Gold** and **6 Silver** medals across various events.
Key Skills: Demonstrated exceptional discipline, resilience, and time management by balancing a rigorous 15+ hour weekly training schedule with a full-time academic load.

Projects

AI-Powered Smart Guardian[Nexus AI]
Python, YOLOv8, OpenCV, ESP32-CAM, Arduino: An AI-powered safety system that uses computer vision to detect falls and hazards in real time, automatically sending emergency SMS alerts to caregivers for timely assistance.
Offline RAG Assistant
Python, Flask, Ollama, FAISS, Local LLMs: A privacy-focused offline AI assistant that performs document-based question answering using Retrieval-Augmented Generation (RAG), local LLMs, and semantic search without requiring internet access.
Automatic Number Plate Recognition (ANPR)
Python, YOLOv8, OpenCV, OCR: A vehicle number plate detection and recognition system using YOLOv8, OCR, and custom-trained datasets for real-time traffic monitoring and vehicle identification.
Student Hub (Vidhyardhi)
Flask, MySQL, JavaScript, Firebase: A full-stack student management platform for attendance tracking, class schedules, study materials, previous-year question papers, and academic resource management with role-based access.
